Resilient Development

Systematization of Results

**Monitoring and Evaluation of
Adaptation: Overview Session**

February 8th, 2018
Fiji

Angelica V Ospina, PhD

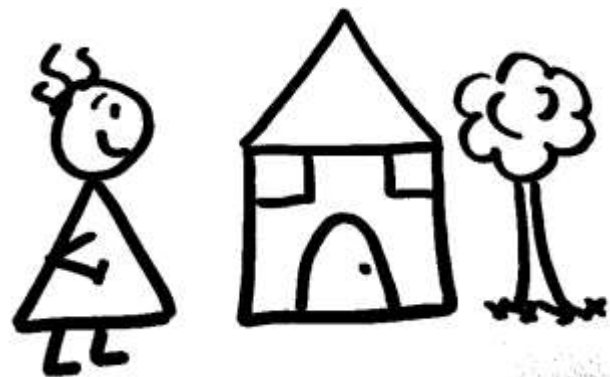

M&E Overview

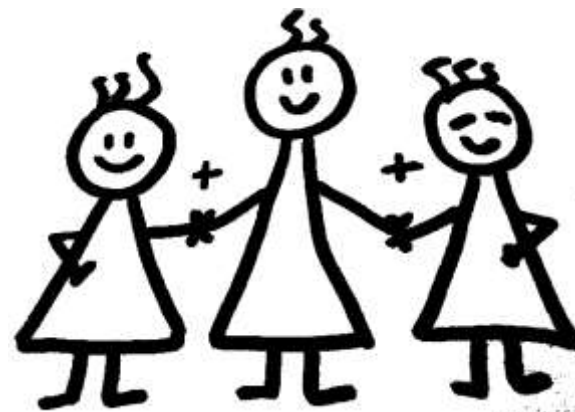

TTF Participatory Exercise

- 6 WGs, approx. 42 participants
- A total of 226 ideas shared
- Grouped around 4 M&E themes:

Purpose & Use M&E Results

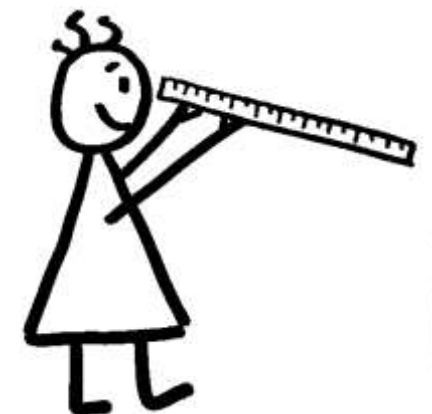

Stakeholder Engagement

Resources

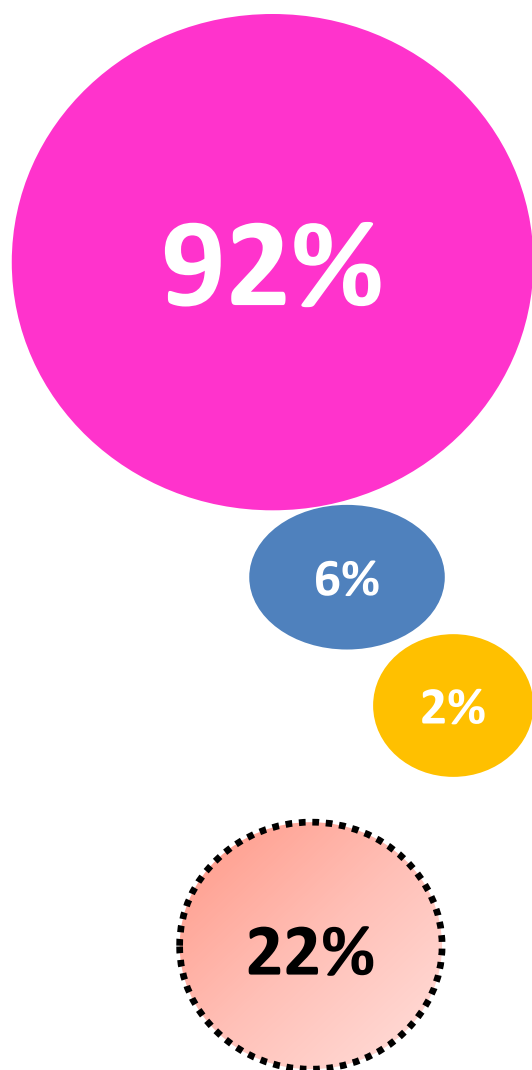

Methods & Tools

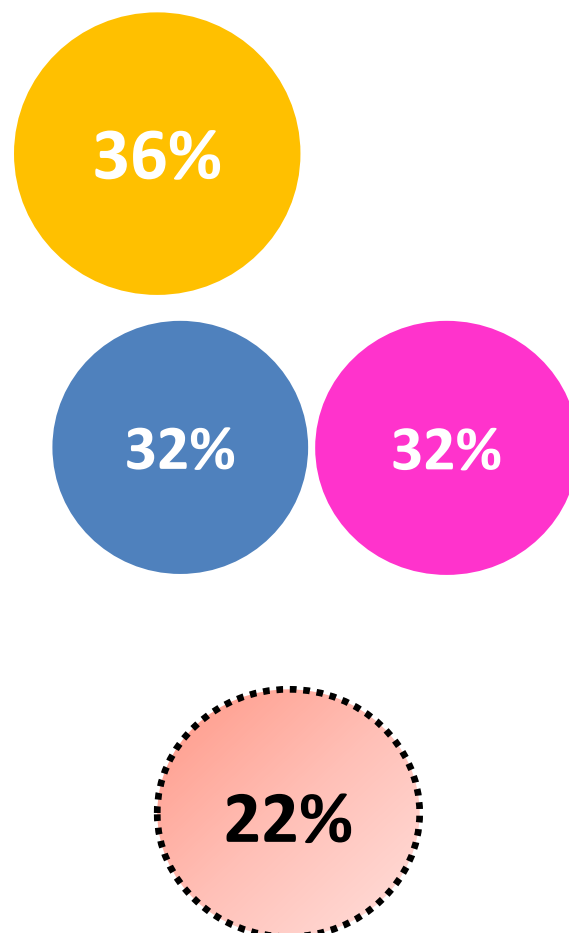

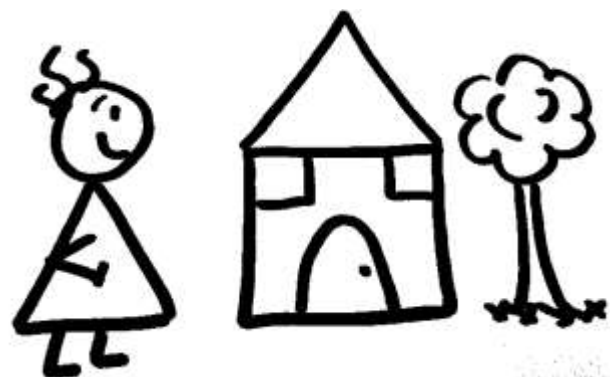

Results

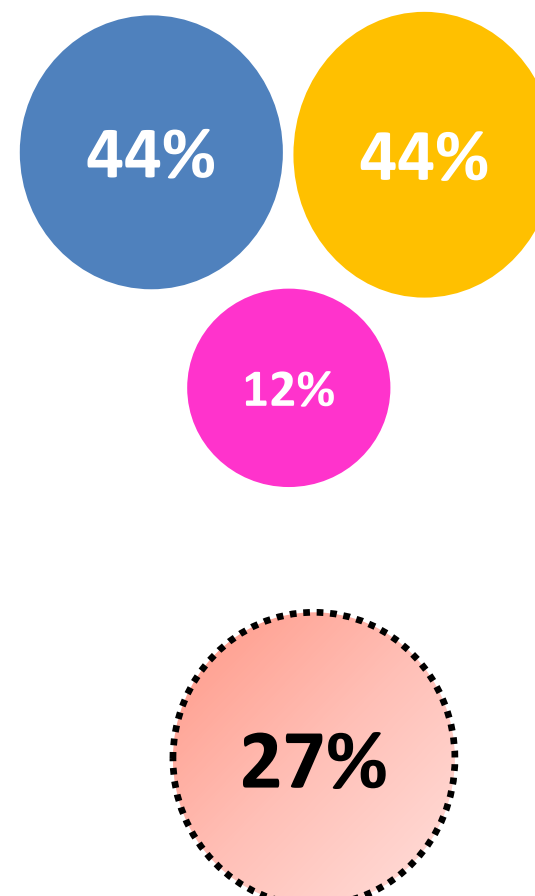

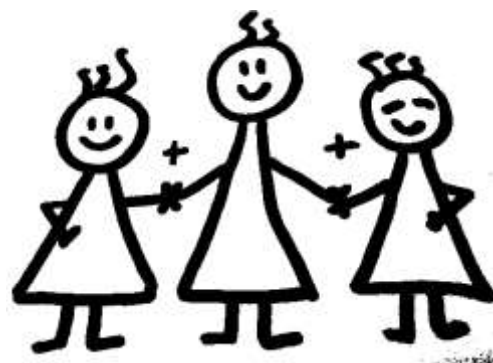

Participatory Exercise

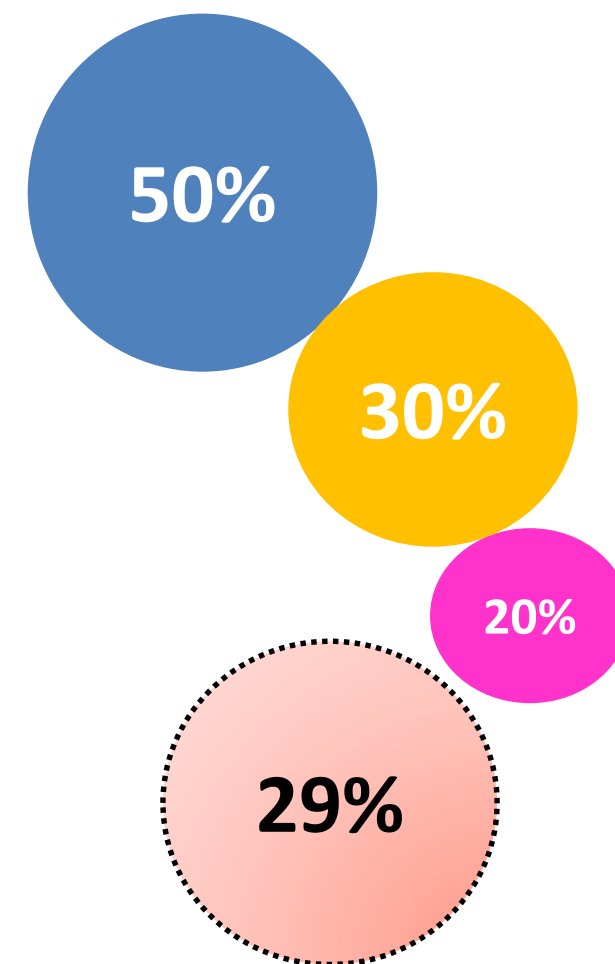

Purpose & Use M&E Results

Stakeholder Engagement

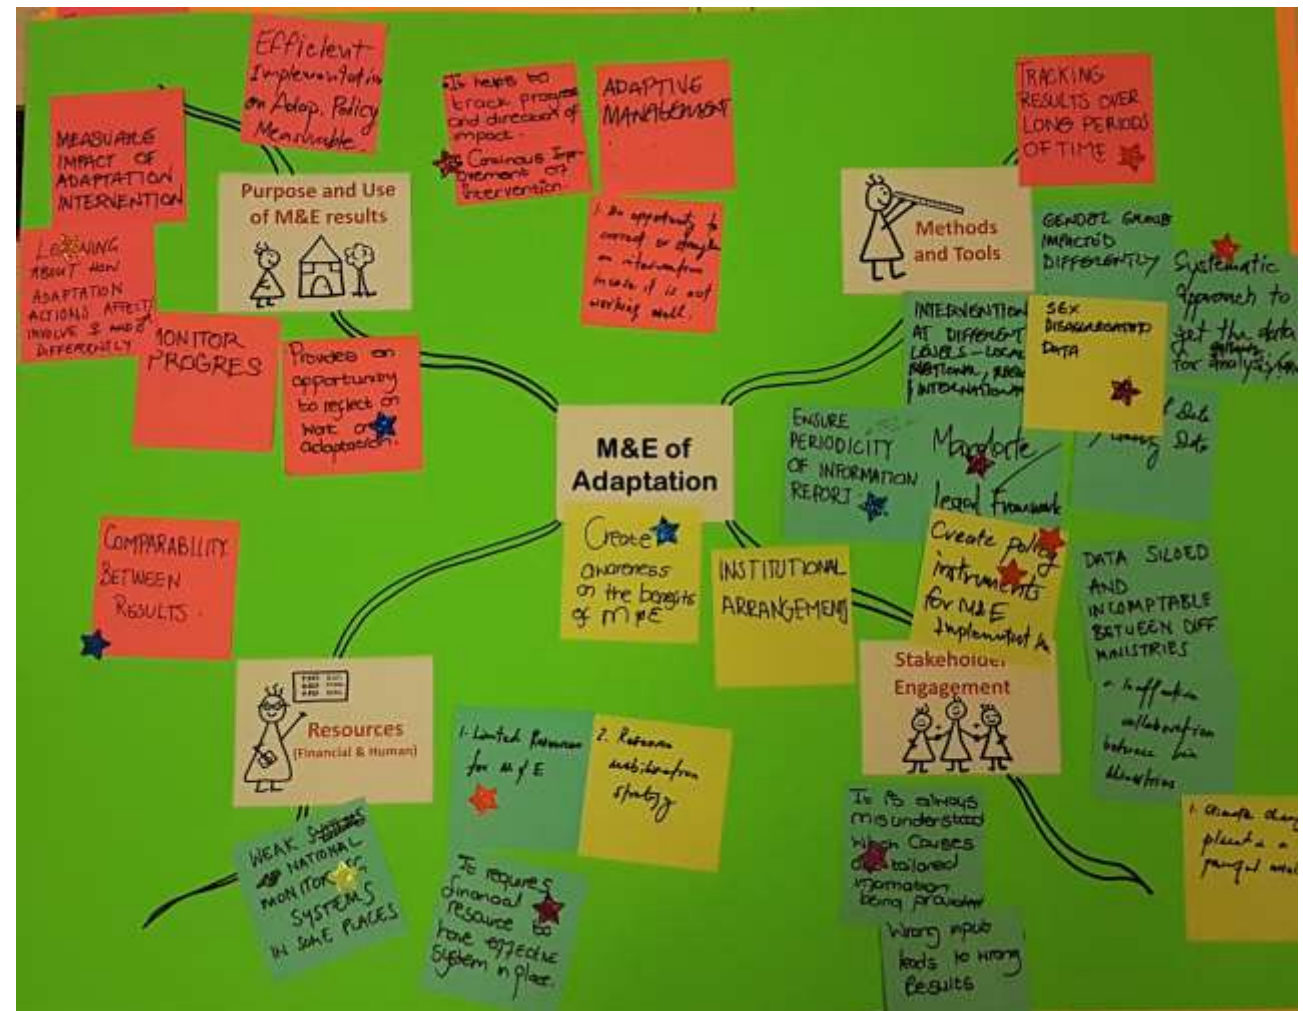

Resources

Methods & Tools

Visual Map of ideas/perceptions about M&E

	OPPORTUNITIES/ADVANTAGES of M&E of adaptation
	CHALLENGES
	POTENTIAL SOLUTIONS

M&E Overview: Participatory Exercise

Systematized by: Angelica V Ospina, IISD

Purpose and Use of M&E Results

- **To review and make adjustments
- **Sharing best practices in adaptation
- *To inform the effectiveness of your intervention
- *To improve delivery of support
- *Learning about how adaptation actions affect/involve men and women differently
- *Provides opportunity to reflect on work on adaptation
- *Comparability between results
- *Continuous improvement of intervention
- Adaptive ma*To know that the implementation aligns or not with the plan
- *Measure the impacts of adaptation actions
- *Put facts on the table
- *Consistency with international reports
- *Measure progress
- *Measurement of success/short-fall
- *Allows for accountability
- Enables understanding of impacts and outcomes
- Articulates what change is expected to occur
- Fully utilize resources for the main purpose
- To determine the effectiveness
- Contextualize the NAP process
- Avoid maladaptation
- An opportunity to correct of strengthen an intervention in case it is not working well.
- It helps to track progress and direction of impact
- Efficient implementation on adaptation policy measurable
- Monitor progress
- Measure impact on adaptation intervention
- To track progress
- Keep track of process and issues
- To plan for future activities
- Determine progress on adaptation indicators
- Identify gaps
- Know the gaps
- Track the state of implementation reached in a project
- Know the adjustment in activities of adaptation
- Provide corrective actions
- Allow to move on to next stage
- Support the ability to measure progress
- To get feedback of the implementation of adaptation activities
- Allow for collection of lessons learnet/challenges
- Improve implementation or input

Stakeholder Engagement

- **To strengthen policies, plans, guidelines and projects in relation to climate change adaptation
- *Opportunity to involve line Ministries, local communities and other enabling actors
- *Motivate stakeholders to contribute
- *Information is centralized (from many sources)
- Engage people in determining what needs to be monitored and evaluated
- Organizing data collection efforts
- Scale up the importance of adaptation actions in several sectors
- One understanding
- No surprises in your backyard
- Support from stakeholders
- Iterative learning
- Report on M&E findings for sound decision making
- Working together
- Community outreach and engagement
- Identify the barriers/blocks
- Improve coordination of stakeholders
- **Poor institutional arrangements
- *It is always misunderstood, which causes a lot of tailored information being provided
- *Mandate/legal framework
- *Coordination and integration: knowledge and resources.
- *Lack of stakeholder commitment
- *Lack of data/information sharing
- *Stakeholders involvement
- Public awareness
- Identify and include local actions
- Network/communication breakdown
- Commitment
- Coordination
- Sharing data knowledge
- Wrong input leads to wrong results
- Data siloed and incompatible between different Ministries
- Ineffective collaboration between Ministries

Resources

- *Allows identification of cost-effective actions
- *Allow measurement of effects/impacts of interventions
- Allows to adjust and orient the interventions
- Better use of limited resources
- Spend according to agreed purpose
- Resources are utilized appropriately
- Technical officers from different stakeholders
- *Weak national monitoring systems in some places
- *It requires financial resources to have an effective system in place
- *Limited resources for M&E
- *Responsibility on information reporting
- *Adequate financial resources
- *Funds
- *Costs
- Continuity
- Lack of capacity to implement
- M&E capacity
- Capacity of line Ministry in M&E/technical expertise
- Accessibility of M&E reports and materials
- Resources (human, financial, physical)
- Not a top priority in national agenda
- Lack of technical experts (statistics, programmers, etc) working on adaptation
- Lack of resources
- Diversity/remoteness
- Multi-level nature of adaptation (aggregation without losing context)
- Having the technical expertise
- Knowledge of technical skills
- Lack of resources
- Available resources
- Insufficient capacities
- Lack of capacity (knowledge)
- Lack of expertise to analyze data
- Lack of/insufficient resources (human, funds)
- Lack of financial resources and technical expertise

Methods and Tools

- **Indicators that are well defined
- *Tracking results over long periods of time
- *Are the implemented adaptation measures reducing vulnerability?
- Any other person can replicate your work
- Doing adaptation resilience better
- Follow the evolution of processes
- Measure progress achieved
- Data availability/needs
- To strengthen M&E framework
- Synthesize information
- It allows effective collection of information for decision making purposes
- Learning about what works over time
- Have the same systems all around the world
- *****Having good and measurable indicators
- ***Lack of data
- **Difficulty in identifying correct indicators
- *Comparison between different projects (scale, complex)
- *Different interpretation of the same data
- *Balancing between simplicity and complexity
- *Lack of expertise in identifying indicators
- *Ensure periodicity of information reporting
- *Systematic approach to get the data gathered for analysis/MRV
- *M&E training institution
- *Lack of disaggregated data
- *Data and information proper storage software
- *Indicators that are well defined
- *Do not know that the results are linked to cc or may be from BAU
- *Availability of data
- *Lack of data/systems
- *Clear indicators
- Data challenge
- Data well adapted
- How to measure progress?
- Adaptation is a dynamic process
- Lack of/poor quality data
- Data collection
- Lack of network resources available
- Methodology is not localized
- Lack of data
- Lack of data/quality data
- Gender groups impacted differently
- Intervention at different levels (local, national, regional, international)
- Lack of M&E guidelines, policy/tools
- Lack of appropriate tools for M&E
- Unclear implementation arrangements
- Approaches to understand M&E

	OPPORTUNITIES/ADVANTAGES of M&E of adaptation
	CHALLENGES
	POTENTIAL SOLUTIONS

M&E Overview: Participatory Exercise

Systematized by: Angelica V Ospina, IISD

Purpose and Use of M&E Results

- Realize being on track
- Track the progress to allow implementers to make changes if necessary
- To enable review of the process
- Measure success or failures
- Provide decision makers with what they can plan in relation to the result of the M&E
- Lack of proper reporting
- Meet different expectations about M&E
- Lack of clarity on what is to be monitored and evaluated
- *Clear mandate for M&E

-

Stakeholder Engagement

- *****Stakeholder engagement
- **Create policy instruments for M&E implementation
- **Gender participation in the M&E system
- **Multisectoral integration of data
- *Stakeholder collaboration
- *Develop a participatory process with multiple stakeholders from the beginning
- *Create awareness on the benefits of M&E
- Standarised reporting across stakeholders
- Building up from good network with stakeholders and follow-up plans
- Deliver training workshops to all stakeholders for more understanding
- Gender responsiveness considered –full participation of gender
- Cooperation with leading parties
- Involve the decision makers
- Proper institutional arrangement
- Communications strategy
- Climate change placed in a powerful Ministry
- Institutional arrangements
- Establish M&E in training institutions

Resources

- *****Capacity building
- ***Adequate capacity building at the country level
- **Financing of data collection
- **Budget allocation for M&E activities
- **Proper budgeting
- *Provide adequate resources (financial and human)
- *Capacity building
- *Provide technical M&E training and reporting
- *Exchanges and consultations
- *Capacity building (experts/planners/implementers)
- *Work with what you have and improve gradually
- Install proper/suitable software for M&E, easy for disaggregating
- Mobilization of proper resources (human, funds)
- More resources (financial/technical)
- Strengthen capacity
- Strengthen capacities of the different stakeholders involved
- NAP process: opportunity to design robust systems
- Workshops and training (technical cooperation)
- Capacity building using best practices
- Capacity building for M&E and adaptation
- Investment in M&E
- Cross-ministerial committee
- Co-work with universities and academics
- Provide necessary resources
- Develop M&E database
- M&E: progress, effectiveness, gaps. Adopt this to internal government process and get political commitment
- Resource mobilization strategy

Methods and Tools

- ***Training
- **Develop baselines (common/shared)
- *Sex disaggregated data
- *Policy support: national agenda mandate/financial support
- *Awareness creation and capacity building on data collection
- Using NAP process as a guideline
- Develop a database
- Develop a database
- Standarization of tools for data collection
- Documentation to provide a common understanding
- Research
- Improve data collection tools/capacity building, etc
- Seek technical assistance from NAP GN
- Contextualize, methodology
- Training on data collection and analysis
- Setting up of gender disaggregated data
- Develop M&E system and tools
- Provide a clear, simple and applicable approach to do M&E
- Gender responsive M&E
- Reviewing M&E framework and tools

Ideas prioritized
