GUIDANCE NOTES

[Financing National Adaptation Plan \(NAP\) Processes: Contributing to the achievement of nationally determined contribution \(NDC\) adaptation goals](#)

This guidance note aims to assist countries with determining how to secure the financing for their National Adaptation Plan (NAP) processes. Financing is needed throughout the entire NAP process to enable its potential to be reached—from its initiation to the implementation, monitoring and evaluation of prioritized adaptation actions.

[Vertical Integration in National Adaptation Plan \(NAP\) Processes: A guidance note for linking national and sub-national adaptation](#)

This guidance note is designed for country teams and other stakeholders interested in strengthening vertical integration in NAP processes. It outlines the key issues and questions to consider to facilitate vertical integration throughout the NAP process, as well as practical case examples. It is available in English, French and Spanish.

sNAPshot POLICY BRIEFS

Series 1: sNAPshot | Initiating sector integration of adaptation considerations

Overview brief: [Strategic Communications for NAP Processes](#)

Series 5: sNAPshot | Monitoring and Evaluation in the NAP Process: Opportunities, challenges and emerging solutions

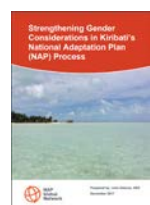

Overview brief: [Monitoring and Evaluation in the NAP Process: Opportunities, challenges and emerging solutions](#)

GENDER-RESPONSIVE NAP PROCESSES

[A Framework for Gender-Responsive National Adaptation Plan \(NAP\) Processes](#)

Gender equality is a key area of intersection across both the Sustainable Development Goals (SDGs) and the Paris Agreement. This brief discusses gender equality in the context of the formulation and implementation of the National Adaptation Plan (NAP) process. It presents the rationale for considering gender issues in climate change adaptation and introduces a working framework for gender-responsive NAP processes. It aims to promote discussion and reflection on integration of gender by actors engaged in NAP processes.

[Strengthening Gender Considerations in Kiribati's NAP Process](#)

The purpose of this scoping study is to explore options for strengthening gender considerations in Kiribati's National Adaptation Plan (NAP) process with a focus on its NAP document, the Joint Implementation Plan on Climate Change and Disaster Risk Management (KJIP), which is expected to be revised in 2018 to reflect the government's new priorities.

EXPERT PERSPECTIVE

[Using NDCs, NAPs and the SDGs to Advance Climate-Resilient Development](#)

The article discusses how the NAP process can provide an operational bridge between countries' Nationally Determined Contribution (NDC) adaptation components and the Sustainable Development Goals (SDGs). It is part of a series convened by the NDC Partnership exploring key issues countries face as they implement their NDCs under the Paris Agreement on climate change.
