

BENIN

NATIONAL ADAPTATION PLAN (NAP) APPROACH:

A nationally led approach that seeks to integrate climate change adaptation in development planning at the national, local and sectoral levels.

The NAP process has been underway in Benin since 2013. A roadmap for the NAP process has been defined, and national consultations have engaged stakeholders through the National Committee on Climate Change (CNCC in French). Climate change adaptation has been considered in the development of the National Development Plan and the definition of targets for the SDGs, as well as in a number of Communal Development Plans.

Key Climate Change Impacts

Floods

Sea level rise

Late and heavy rains

Droughts

Excessive heat

Strong winds

Priority Sectors For Adaptation

Agriculture

Health

Infrastructure

Freshwater resources

Ecosystems

Tourism

Energy

Coastlines

NAP Process Milestones

2013

NAP launch workshop

2017

Capacity building for national and sectoral actors

2018

Launch of **in-depth vulnerability studies**
Benin hosts 11 countries for the first **Francophone Forum on the NAP Process**

Integration of climate change adaptation into the **National Health Development Plan** and the **National Development Plan**

2022

Launch of **NAP Document**

Submission of the **Adaptation Communications (AdCom)** to the UNFCCC

FEBRUARY 2023

The NAP Global Network is a group of individuals and institutions working to enhance national adaptation planning and action in developing countries. This poster is part of a series highlighting lessons emerging about the NAP process.
