

# HAITI

## NATIONAL ADAPTATION PLAN (NAP) APPROACH:

An inclusive, participatory, forward-looking, and systemic approach

As a small island developing state (SIDS) and least developed country (LDC), the Republic of Haiti is extremely vulnerable to the impacts of climate change. Led by the Ministry of the Environment and the Ministry of Planning and External Cooperation, the Republic of Haiti developed its first NAP with support from the Green Climate Fund and the United Nations Development Programme (UNDP). The NAP has a time horizon of 2022–2030 and financial needs for its implementation are estimated to be a minimum of USD 980 million.

### Key Climate Change Impacts

Rise in sea level

Likely increase in hurricane intensity

Heat waves

Flooding

Increase in temperatures

Increase in intense rainfall episodes

### Priority Sectors for Adaptation

Water

Agriculture

Infrastructure

Health

### NAP Process Milestones

2020

Launch of the NAP process

Targeted literature review to **identify and understand** the impacts, risks, and vulnerabilities to climate change

2021

12 consultation workshops to **identify and prioritize the adaptation actions** envisaged for the selected sectors

Submission of the **Adaptation Communication** to the UNFCCC

2022

**National validation** workshop

Official launch of the **NAP document**

MARCH 2023

The NAP Global Network supports developing countries in advancing their NAP processes to help accelerate climate change adaptation efforts around the world. This poster is part of a series highlighting lessons emerging about the NAP process.
