

# SAINT LUCIA

## NATIONAL ADAPTATION PLAN (NAP) VISION

Saint Lucia's people, their livelihoods, social systems, and environment are building resilience to climate change risks and impacts through continuous, coordinated, and effective adaptation efforts.

Saint Lucia's NAP is a 10-year process that lays out how the country and its population will adapt to the urgent and growing threat of climate change. It includes priority adaptation measures for eight key sectors, which are complemented, incrementally, with Sectoral Adaptation Strategies & Action Plans (SASAPs). The Department of Sustainable Development spearheaded the development of the NAP in 2017 through a participatory process involving multiple stakeholders.

### SYNERGIES

"Something really commendable about this process is that we have used what was already there. The NAP and the SASAPs are built on the efforts made by multiple stakeholders in the past and therefore, they can identify with it and count themselves as having been significant contributors."

**Dawn Pierre-Nathaniel**

Deputy Chief Sustainable Development & Environment Officer, Department of Sustainable Development

### HORIZONTAL AND VERTICAL INTEGRATION

As part of our NAP process, we've developed supplements in order to provide useful tools for stakeholders. These include, but are not limited to:

- Stocktaking, Climate Risk and Vulnerability Assessment Report
- Roadmap & Capacity Development Plan
- Communications Strategy
- Project Concept Note Portfolios per sector
- Monitoring & Evaluation Plan
- Guidelines for Training in SASAP Development
- Climate Financing Strategy
- Private Sector Engagement Strategy
- Climate Research Policy & Strategy
- Sectoral & Resilient Ecosystems — Adaptation Strategies and Action Plans (SASAPs/REASAP)

## MARCH 2023

The NAP Global Network is a group of individuals and institutions working to enhance national adaptation planning and action in developing countries. This poster is part of a series highlighting lessons emerging about the NAP process.
