

About	This overview is part of a series prepared by the NAP Global Network Secretariat sharing analysis of the structures of national adaptation plan (NAP) documents.
	For more overviews of NAP documents, please visit the NAP Trends platform hosted by the NAP Global Network at: https://trends.napglobalnetwork.org/
	To read the full NAP document, visit the United Nations Framework Convention on Climate Change's (UNFCCC) NAP Central: https://napcentral.org/

Document Title	Kenya National Adaptation Plan 2015 - 2030
Year of NAP submission to the UNFCCC	2017
Version	1
Last updated on	2024-11-19

Level	Label	Content	Parent Tag	Page #
1	Vision			
		Enhanced climate resilience towards the attainment of Vision 2030		3
2	Objectives			
	Objective 1	Highlight the importance of adaptation and resilience building actions in development		3
	Objective 2	Integrate climate change adaptation into national and county level development planning and budgeting processes		3
	Objective 3	Enhance the resilience of public and private sector investment in the national transformation, economic and social and pillars of Vision 2030 to climate shocks		3
	Objective 4	Enhance synergies between adaptation and mitigation actions in order to attain a low carbon climate resilient economy		3
	Objective 5	Enhance resilience of vulnerable populations to climate shocks through adaptation and disaster risk reduction strategies		3
3	Actions			
	Action 1	Devolution: Mainstream climate change adaptation into County Integrated Development Plans and other county plans		22
	Action 2	Energy: Enhance implementation of an energy generation mix plan that increases the resilience of the current and future energy systems to the impacts of future climate variability and change		23
	Action 3	Science, Technology and Innovations: Support innovation and development of appropriate technologies and capacity that promote climate resilient development		24
	Action 4	Public Sector Reforms: Integrate climate change adaptation into public sector reforms		25
	Action 5	Human Resource Development, Labour and Employment: Enhance adaptive capacity and resilience of the informal sector		26
	Action 6	Infrastructure: Enhance climate proofing of infrastructure		27
	Action 7	Land Reforms: Mainstreaming climate change adaptation in land reforms		28
	Action 8	Education and Training: Mainstream climate change adaptation in education (formal, nonformal and informal) and training		29
	Action 9	Health: Strengthen integration of climate change adaptation into the health sector		30
	Action 10	Environment: Mainstream climate change adaptation in the environment sector		31
	Action 11	Water and Sanitation: Mainstreaming of climate change adaptation in the water sector		33
	Action 12	Population, Urbanisation and Housing: Enhance the adaptive capacity of the population, urbanisation, and housing sector		34
	Action 13	Gender, Vulnerable Groups and Youth: Strengthen the adaptive capacity of vulnerable groups (women, orphans and vulnerable children, the elderly, and persons with disability)		35
	Action 14	Tourism: Enhance the resilience of the tourism value chain		36
	Action 15	Agriculture: Enhance the resilience of the agricultural value chain		37
	Action 16	Livestock: Enhance the resilience of the livestock value chain		38
	Action 17	Fisheries: Enhance the resilience of the fisheries value chain		39
	Action 18	Private Sector/trade; Manufacturing; Business process outsourcing; Financial services: Create enabling environment for the resilience of private sector investment		40
	Action 19	Oil and Mineral Resources: Integrate climate change adaptation into the oil and mineral resources sector		41
	Action 20	Cross cutting MTP sector - Common Programme Framework for Ending Drought Emergencies 2012-2022: Fast track the implementation of the Ending Drought Emergencies (EDE) Common Programme Framework		42
4	Sub-actions			
	Sub-action 1.1	Conduct participatory county level climate risk and vulnerability assessments	Action 1	22
	Sub-action 1.2	Increase awareness of climate change impacts to communities in counties	Action 1	22
	Sub-action 1.3	Build the capacity of county governments on climate change adaptation	Action 1	22
	Sub-action 1.4	Develop county adaptation plans	Action 1	22
	Sub-action 1.5	Develop county climate financing mechanisms for adaptation	Action 1	22
	Sub-action 1.6	Develop appropriate climate adaptation financing tracking systems	Action 1	22
	Sub-action 1.7	Implement county adaptation plans	Action 1	22
	Sub-action 1.8	Upscale successful adaptation actions	Action 1	22
	Sub-action 2.1	Conduct risk and vulnerability assessments of energy infrastructure	Action 2	23
	Sub-action 2.2	Increase the solar, wind and other renewable energy systems network to provide power to off-grid areas	Action 2	23

	Sub-action 2.3	Increase small hydropower and geothermal power generation plants to provide electricity to communities and businesses in the rural areas enabling job creation	Action 2	23
	Sub-action 2.4	Promote energy efficiency programmes	Action 2	23
	Sub-action 2.5	Continue the rehabilitation of water catchment areas in order to provide sustainable ecosystem services, including energy production	Action 2	23
	Sub-action 3.1	Promote development of technology prototypes	Action 3	24
	Sub-action 3.2	Ensure intellectual property laws protect climate innovation and technology	Action 3	24
	Sub-action 3.3	Promote development of locally available technologies in support of adaptation to climate change	Action 3	24
	Sub-action 3.4	Promote and facilitate transfer of appropriate technologies to the most vulnerable	Action 3	24
	Sub-action 3.5	Strengthen science policy and practice	Action 3	24
	Sub-action 3.6	Upscale successful technologies	Action 3	24
	Sub-action 4.1	Re-orient the curricula of the Kenya School of Government to include climate change adaptation as a cross cutting issue	Action 4	25
	Sub-action 4.2	Develop a climate change adaptation manual for public sector enforcement and compliance	Action 4	25
	Sub-action 4.3	Ensure that climate change adaptation and resilience building is captured in performance contracting for government sectors	Action 4	25
	Sub-action 4.4	Update the Kenya School of Government curricula and performance contracts as required with climate change adaptation issues	Action 4	25
	Sub-action 5.1	Risk and vulnerability assessment of the informal sector	Action 5	26
	Sub-action 5.2	Conduct capacity building on 'green jobs' and enterprises	Action 5	26
	Sub-action 5.3	Enhance access to the Kenya Climate Fund for climate proofing investments to increase opportunities for small and medium enterprises	Action 5	26
	Sub-action 5.4	Upscale climate resilient enterprises	Action 5	26
	Sub-action 6.1	Conduct risk and vulnerability assessments of existing infrastructure	Action 6	27
	Sub-action 6.2	Conduct risk and vulnerability assessments of upcoming infrastructure (roads, railways, marine, aviation, buildings, ICT)	Action 6	27
	Sub-action 6.3	Conduct an assessment of whether existing and planned infrastructural assets are compatible with a low carbon climate resilient economy	Action 6	27
	Sub-action 6.4	Conduct capacity building on infrastructure climate proofing	Action 6	27
	Sub-action 6.5	Climate proof buildings, roads, railway, marine, aviation and ICT infrastructure through use of appropriate designs and building materials	Action 6	27
	Sub-action 6.6	Re-assess infrastructure vulnerability and upgrade infrastructure to withstand climate impacts with the latest technology	Action 6	27
	Sub-action 7.1	Build the capacity of land planners in climate change landuse planning	Action 7	28
	Sub-action 7.2	Integrate climate change scenarios into spatial planning (climate resilient spatial planning)	Action 7	28
	Sub-action 7.3	Build the capacity of land managers in climate change adaptation	Action 7	28
	Sub-action 7.4	Update land-use plans with climate scenarios	Action 7	28
	Sub-action 8.1	Assess the inclusion of climate change adaptation in school curricula	Action 8	29
	Sub-action 8.2	Design appropriate education material with climate change issues	Action 8	29
	Sub-action 8.3	Integrate climate change adaptation issues into the formal education curriculum	Action 8	29
	Sub-action 8.4	Integrate climate change adaptation into the education policy	Action 8	29
	Sub-action 8.5	Develop and implement a public awareness mechanism on climate change adaptation	Action 8	29
	Sub-action 8.6	Operationalise the climate change resource centre and enhance linkages with other resource centres at all levels	Action 8	29
	Sub-action 8.7	Update curriculum and public outreach strategies on climate change adaptation as necessary	Action 8	29
	Sub-action 9.1	Undertake a climate vulnerability and risk assessment of the impacts of climate change and variability on human health	Action 9	30
	Sub-action 9.2	Increase public awareness and social mobilisation on climate change and impacts on health	Action 9	30
	Sub-action 9.3	Design appropriate climate change related interventions for the health sector	Action 9	30
	Sub-action 9.4	Design appropriate measures for surveillance and monitoring of climate change related diseases in order to enhance early warning systems which includes enhancing existing databases on health sector indicators amongst others	Action 9	30
	Sub-action 9.5	Upscale results of pilot projects in climate change adaptation in the health sector	Action 9	30
	Sub-action 10.1	Improve public outreach on environmental issues	Action 10	31
	Sub-action 10.2	Operationalise the climate change coordinating institutions proposed in the Climate Change Act 2016	Action 10	31
	Sub-action 10.3	Review and update existing Environmental Impacts Assessment (EIA) regulations with climate change adaptation considerations	Action 10	31
	Sub-action 10.4	Enhance the capacity to enforce and monitor compliance of adaptation actions	Action 10	31
	Sub-action 10.5	Strengthen early warning and climate information services through improving the Climate Information Service Providers network and enhancing integration of local/indigenous knowledge into early warning systems	Action 10	31
	Sub-action 10.6	Enhance participatory scenario planning with communities	Action 10	31
	Sub-action 10.7	Undertake climate vulnerability and risk assessments on ecosystems and provide guidance on relevant adaptation actions	Action 10	31
	Sub-action 10.8	Finalise and implement the wildlife adaptation strategy	Action 10	31
	Sub-action 10.9	Develop a forestry adaptation strategy	Action 10	31
	Sub-action 10.10	Strengthen tree-planting and conservation initiatives	Action 10	31
	Sub-action 10.11	Strengthen the capacity of national and county institutions responsible for coordinating climate change adaptation	Action 10	32
	Sub-action 10.12	Improve and expand existing climate change modelling work by Kenya Meteorological Department	Action 10	32
	Sub-action 10.13	Provide guidance and improve access to climate resilient tree species and cultivars	Action 10	32
	Sub-action 10.14	Integrate ecosystem and community based approaches in sector strategies in support of adaptation to reduce natural resource based conflicts	Action 10	32
	Sub-action 10.15	Continue the rehabilitation of water catchment areas in order to provide sustainable ecosystem services	Action 10	32
	Sub-action 11.1	Enhance capacity of institutions and bodies responsible for water and sanitation on climate change impacts and the water sector	Action 11	33

	Sub-action 11.2	Promote awareness on climate change impacts and the water sector including promoting public awareness on water conservation (recycling, waste water management) and efficient water use	Action 11	33
	Sub-action 11.3	Mainstream disaster risk reduction measures in the water sector planning and service delivery, particularly in vulnerable, high risk regions	Action 11	33
	Sub-action 11.4	Promote the use of efficient irrigation systems	Action 11	33
	Sub-action 11.5	Enhance collaboration of trans boundary water resource management	Action 11	33
	Sub-action 11.6	Strengthen water resource monitoring and assessment for early warning and planning	Action 11	33
	Sub-action 11.7	Promote technologies that enhance water resource efficiency	Action 11	33
	Sub-action 11.8	Implement the National Water Master Plan	Action 11	33
	Sub-action 12.1	Conduct climate risk and vulnerability assessment of the sector	Action 12	34
	Sub-action 12.2	Increase awareness on impacts of climate change on population and housing	Action 12	34
	Sub-action 12.3	Strengthen the enforcement of building codes by national and county governments	Action 12	34
	Sub-action 12.4	Integrate adaptation into relevant building and urban planning policies and regulations	Action 12	34
	Sub-action 12.5	Enhance the adaptive capacity of the urban poor by increasing the number of affordable housing and related infrastructure	Action 12	34
	Sub-action 13.1	Enhance access to the youth and women enterprise funds	Action 13	35
	Sub-action 13.2	Strengthen and expand social protection and insurance mechanisms against main climate hazards	Action 13	35
	Sub-action 13.3	Establish affordable and accessible credit lines for the urban and rural poor, youth and other vulnerable groups	Action 13	35
	Sub-action 13.4	Create awareness for climate opportunities that women and youth can access	Action 13	35
	Sub-action 13.5	Promote livelihood diversification for vulnerable groups in order to reduce rural-urban migration	Action 13	35
	Sub-action 13.6	Promote and support climate resilient sustainable livelihoods	Action 13	35
	Sub-action 14.1	Conduct a climate risk and vulnerability assessment of the tourism sector	Action 14	36
	Sub-action 14.2	Build capacity and raise awareness on impacts of climate change on the tourism sector to relevant departments and partners	Action 14	36
	Sub-action 14.3	Develop climate resilient action plans for the sector	Action 14	36
	Sub-action 14.4	Enhance the diversification of climate resilient tourism products	Action 14	36
	Sub-action 14.5	Design a pilot project that enhances resilience in the tourism sector	Action 14	36
	Sub-action 14.6	Upscale successful pilot projects	Action 14	36
	Sub-action 15.1	Promote indigenous knowledge on crops	Action 15	37
	Sub-action 15.2	Increase awareness on climate change impacts on the agriculture value chain	Action 15	37
	Sub-action 15.3	Conduct climate risk and vulnerability assessments of the agriculture value chain	Action 15	37
	Sub-action 15.4	Coordinate and mainstream climate change adaptation into agricultural extension	Action 15	37
	Sub-action 15.5	Promote new food habits	Action 15	37
	Sub-action 15.6	Establish, maintain and promote the uptake of climate change related information on agriculture	Action 15	37
	Sub-action 15.7	Develop and up-scale specific adaptation actions - promotion and bulking of drought tolerant traditional high value crops; water harvesting for crop production; index-based weather insurance; conservation agriculture; agro-forestry; and Integrated soil fertility management	Action 15	37
	Sub-action 15.8	Develop and apply Performance Benefit Measurement methodologies for adaptation and development for the sector	Action 15	37
	Sub-action 15.9	Support adaptation of private sector agricultural value chain actors through capacity building efforts	Action 15	37
	Sub-action 15.10	Promote and implement climate smart agriculture practices in Kenya	Action 15	37
	Sub-action 16.1	Increase awareness on climate change impacts on the livestock sector	Action 16	38
	Sub-action 16.2	Strengthen land use management systems including rangeland management, fodder banks and strategic reserves	Action 16	38
	Sub-action 16.3	Conduct capacity building in indigenous knowledge, livestock insurance schemes, early warning systems, early action, livestock management and breeding	Action 16	38
	Sub-action 16.4	Develop new feeds	Action 16	38
	Sub-action 16.5	Promote livelihood diversification and market access (camels, indigenous poultry, beekeeping, rabbits, emerging livestock - quails, guinea fowls, ostriches etc.)	Action 16	38
	Sub-action 16.6	Establish price stabilization schemes and strategic livestock based food reserves	Action 16	38
	Sub-action 16.7	Restore degraded grazing lands	Action 16	38
	Sub-action 16.8	Enhance selection, breeding and management of animals to adapt to climate change	Action 16	38
	Sub-action 16.9	Promote climate smart agriculture	Action 16	38
	Sub-action 17.1	Undertake risk and vulnerability assessment of the fisheries value chain	Action 17	39
	Sub-action 17.2	Enhance capacity of the Ministry of Agriculture, Livestock and Fisheries and the Kenya Marine Fisheries Institute on the impacts of climate change on fisheries, fishing communities and the private sector	Action 17	39
	Sub-action 17.3	Upscale sustainable aquaculture initiatives	Action 17	39
	Sub-action 17.4	Develop and implement a pilot project on climate resilient fish species and the related value chain	Action 17	39
	Sub-action 17.5	Strengthen monitoring capacity and capability to prevent overfishing and unauthorized exploitation in the inland waters and Exclusive Economic Zone	Action 17	39
	Sub-action 17.6	Promote the up-scaling of climate resilient strategies/ technologies in fisheries and climate resilient fish varieties	Action 17	39
	Sub-action 17.7	Expand the fishing zones in both inland and coastal waters	Action 17	39
	Sub-action 18.1	Build the capacity build of the private sector (formal and informal) so as to enhance the resilience of their investments e.g. through identification of new products and services that are more resilient to climate change impacts	Action 18	40
	Sub-action 18.2	Demonstrate an operational business case for private sector investment in adaptation	Action 18	40
	Sub-action 18.3	Develop fiscal incentive measures to encourage businesses to undertake investment in adaptation and resilience building measures	Action 18	40
	Sub-action 18.4	Implement long term private sector investment in adaptation and resilience building measures	Action 18	40

	Sub-action 19.1	Build the capacity of the Mining, Health Safety and Environment division on climate change adaptation	Action 19	41
	Sub-action 19.2	Conduct an assessment of impacts of mining, oil and gas exploration to ecosystems and communities with respect to climate change variability and future change	Action 19	41
	Sub-action 19.3	Develop the capacity of mining communities to integrate climate change in the community development agreements with private companies	Action 19	41
	Sub-action 19.4	Build the capacity of the actors in the oil and gas sector in climate change adaptation	Action 19	41
	Sub-action 19.5	Integrate climate change in the mining, policy and regulatory framework	Action 19	41
	Sub-action 19.6	Update risk assessments	Action 19	41
	Sub-action 19.7	Maintain climate resilient oil and mineral resource exploitation	Action 19	41
	Sub-action 20.1	This sector hopes to deliver the following results through the six pillars: Eliminate the conditions that perpetuate vulnerability	Action 20	42
	Sub-action 20.2	This sector hopes to deliver the following results through the six pillars: Enhance the productive potential of the region	Action 20	42
	Sub-action 20.3	This sector hopes to deliver the following results through the six pillars: Strengthen the institutional capacity for effective risk management	Action 20	42
