

About	This overview is part of a series prepared by the NAP Global Network Secretariat sharing analysis of the structures of national adaptation plan (NAP) documents.
	For more overviews of NAP documents, please visit the NAP Trends platform hosted by the NAP Global Network at: https://trends.napglobalnetwork.org/
	To read the full NAP document, visit the United Nations Framework Convention on Climate Change's (UNFCCC) NAP Central: https://napcentral.org/

Document Title	National Climate Change Adaptation Strategy Republic of South Africa
Year of NAP submission to the UNFCCC	2021
Version	1
Last updated on	2024-11-11

Level	Label	Content	Parent Tag	Page #
1	Vision			
		To transition to a climate resilient South Africa, which will follow a sustainable development path, guided by anticipation, adaptation and recovery from a changing climate and environment to achieve our development aspirations		21
2	Strategic objectives			
	Strategic objective 1	Build climate resilience and adaptive capacity to respond to climate change risk and vulnerability		22
	Strategic objective 2	Promote the integration of climate change adaptation response into development objectives, policy, planning and implementation		22
	Strategic objective 3	Improve understanding of climate change impacts and capacity to respond to these impacts		22
	Strategic objective 4	Ensure resources and systems are in place to enable implementation of climate change responses		22
3	Strategic interventions			
	Strategic intervention 1	Reduce human, economic, environmental, physical and ecological infrastructure vulnerability and build adaptive capacity	Strategic objective 1	24
	Strategic intervention 2	Develop a coordinated Climate Services system that provides climate products and services for key climate vulnerable sectors and geographic areas	Strategic objective 1	24
	Strategic intervention 3	Develop a vulnerability and resilience methodology framework that integrates biophysical and socio-economic aspects of vulnerability and resilience	Strategic objective 2	24
	Strategic intervention 4	Facilitate mainstreaming of adaptation responses into sectoral planning and implementation	Strategic objective 2	24
	Strategic intervention 5	Promote research application, technology development, transfer and adoption to support planning and implementation	Strategic objective 3	24
	Strategic intervention 6	Build the necessary capacity and awareness for climate change responses	Strategic objective 3	24
	Strategic intervention 7	Establish effective governance and legislative processes to integrate climate change in development planning	Strategic objective 4	24
	Strategic intervention 8	Enable substantial flows of climate change adaptation finance from various sources.	Strategic objective 4	24
	Strategic intervention 9	Develop and implement an M&E system that tracks implementation of adaptation actions and their effectiveness.	Strategic objective 4	24
4	Strategic outcomes			
	Strategic outcome 1.1	Increased resilience and adaptive capacity achieved in human, economic, environmental, physical and ecological infrastructure	Strategic intervention 1	24
	Strategic outcome 2.1	Climate products and services for key climate vulnerable sectors and geographic areas developed and implemented	Strategic intervention 2	24
	Strategic outcome 3.1	A Climate Risk and Vulnerability Assessment Framework developed and implemented across 100% of key adaptation sectors	Strategic intervention 3	24
	Strategic outcome 4.1	Effective adaptation planning that covers at least 100% of the South African sectors identified in the NCCAS	Strategic intervention 4	24
	Strategic outcome 4.2	Achieve a 100% coverage of climate change considerations in sectoral operational plans	Strategic intervention 4	24
	Strategic outcome 5.1	Increased research output and technology uptake to support planning and implementation	Strategic intervention 5	24
	Strategic outcome 6.1	Capacity building and awareness for climate change response enhanced	Strategic intervention 6	24
	Strategic outcome 7.1	Adaptation governance defined and legislated through the Climate Change Act once approved by parliament	Strategic intervention 7	24
	Strategic outcome 7.2	Institutional structures for climate change adaptation strengthened	Strategic intervention 7	24
	Strategic outcome 7.3	Enhanced public-private-civil society collaboration and stewardship	Strategic intervention 7	24
	Strategic outcome 8.1	Adequate financial resources for national adaptation priorities from national fiscus and international sources	Strategic intervention 8	24
	Strategic outcome 9.1	A national M&E system developed and implemented	Strategic intervention 9	24
5	Actions			
	Action 1.1.1	Strengthen local organisations to support individuals (male and female) and community adaptation	Strategic outcome 1.1	27
	Action 1.1.2	Identify individuals (male and female) and communities at most risk from climate change within municipalities and deliver targeted climate change vulnerability reduction programmes for these individuals and communities	Strategic outcome 1.1	27
	Action 1.1.3	Develop a list of resilience-building projects that can easily be replicated	Strategic outcome 1.1	27
	Action 1.1.4	Capacitate and operationalise South Africa's National Disaster Management Framework to strengthen proactive climate change adaptive capacity, preparedness, response and recovery	Strategic outcome 1.1	27
	Action 1.1.5	Equip and capacitate emergency response departments, such as health and fire, to prepare for and manage climate-related disasters	Strategic outcome 1.1	27
	Action 1.1.6	Invest in knowledge and capacity building for the public, especially vulnerable groups (male and female), to prepare and adapt to climate change	Strategic outcome 1.1	28
	Action 1.1.7	Invest in knowledge and capacity building for climate-resilient rural livelihoods	Strategic outcome 1.1	28
	Action 1.1.8	Launch an enhanced climate change public flagship programme to build a healthier, more resilient society	Strategic outcome 1.1	28
	Action 1.1.9	Equip and capacitate healthcare facilities to manage climate changerelated health effects and climatesensitive diseases	Strategic outcome 1.1	28
	Action 1.1.10	Support small-scale fishers (male and female) to become more climate resilient through use of early warning systems and sea safety training	Strategic outcome 1.1	28
	Action 1.1.11	Support farmers (male and female) to implement more efficient climatesmart and conservation agricultural practices	Strategic outcome 1.1	28
	Action 1.1.12	Promote the expansion of food garden programmes outside of land classified as agricultural land or farmland to reduce food insecurity and hunger	Strategic outcome 1.1	28
	Action 1.1.13	Enhance the role of agricultural extension officers in supporting the most vulnerable farmers (male and female)	Strategic outcome 1.1	29

	Action 1.1.14	Invest in knowledge and capacity building for climate-resilient rural homestead gardening	Strategic outcome 1.1	29
	Action 1.1.15	Support the integration of climatesmart and ecosystem-based approaches in forestry practices	Strategic outcome 1.1	29
	Action 1.1.16	Develop training programmes in effective saving methodologies and access to financial education to better manage meagre resources in vulnerable communities	Strategic outcome 1.1	29
	Action 1.1.17	Investigate the potential for expanding sectors and kick-starting new industries that are likely to thrive as a direct or indirect result of climate change effects	Strategic outcome 1.1	29
	Action 1.1.18	Educate both informal and formal businesses on the potential economic implications of climate change risks and provide support on how to better prepare for these risks in advance	Strategic outcome 1.1	29
	Action 1.1.19	Encourage businesses to relocate to less hazardous areas through incentives and tax rebates	Strategic outcome 1.1	29
	Action 1.1.20	Adopt climate resilient approaches to natural resource management to restore and maintain ecosystem goods and services	Strategic outcome 1.1	30
	Action 1.1.21	Conduct research into the value of ecosystem services and the economic benefits of restoring these services in comparison to the development of hard infrastructure	Strategic outcome 1.1	30
	Action 1.1.22	Provide training for the public and private sectors on the value of ecosystem services and the benefits of restoring them	Strategic outcome 1.1	30
	Action 1.1.23	Protect and conserve South Africa's most vulnerable ecosystems, landscapes and wildlife, and monitor and control the spread of alien invasive species	Strategic outcome 1.1	30
	Action 1.1.24	Monitor and control the spread of alien invasive species that benefit from climate change	Strategic outcome 1.1	30
	Action 1.1.25	Promote the expansion of tree cover, forests and forest plantations in order to maintain the production of wood raw materials, and help reduce temperatures in cities, amongst other benefits	Strategic outcome 1.1	30
	Action 1.1.26	Investigate the potential effects of an expanded forestry sector on water availability	Strategic outcome 1.1	31
	Action 1.1.27	Support farmers (male and female) to use and manage water more sustainably	Strategic outcome 1.1	31
	Action 1.1.28	Ensure that water management institutions incorporate adaptive management responses	Strategic outcome 1.1	31
	Action 1.1.29	Invest in high-quality, climate resilient and eco-sustainable / reduced impact / public infrastructure and materials	Strategic outcome 1.1	31
	Action 1.1.30	Encourage the private sector to build in low climate risk areas, using resilient materials, through incentives and tax rebates	Strategic outcome 1.1	31
	Action 1.1.31	Create a more adaptive energy system to reduce dependence on a centralised system and increase distributed generation, especially in rural areas	Strategic outcome 1.1	31
	Action 1.1.32	Adopt water-wise water management practices in urban areas	Strategic outcome 1.1	31
	Action 2.1.1	Set up a National Climate Centre in an existing institution	Strategic outcome 2.1	37
	Action 2.1.2	Establish an interactive online Climate Service Platform	Strategic outcome 2.1	37
	Action 2.1.3	Establish a Climate Change Science Advisory Technical Council	Strategic outcome 2.1	37
	Action 2.1.4	Continue and enhance climate observation and monitoring networks	Strategic outcome 2.1	37
	Action 2.1.5	Continue to invest in climate change prediction and modelling data	Strategic outcome 2.1	37
	Action 2.1.6	Develop and continuously update a national climate information and early warning system to address the needs of different sectors	Strategic outcome 2.1	38
	Action 2.1.7	Develop provincial early warning systems for vulnerable geographical areas	Strategic outcome 2.1	38
	Action 2.1.8	Develop municipal early warning systems for vulnerable geographical areas	Strategic outcome 2.1	38
	Action 2.1.9	Improve/develop national early warning systems for key climate vulnerable sectors and risks	Strategic outcome 2.1	38
	Action 2.1.10	Develop and support a climate change early warning and vulnerability network with the involvement of relevant stakeholders	Strategic outcome 2.1	38
	Action 2.1.11	Investigate alternative technologies that can be used considering the 4th industrial revolution	Strategic outcome 2.1	38
	Action 2.1.12	Develop adaptation strategies for those that are displaced by climate change	Strategic outcome 2.1	38
	Action 3.1.1	Develop a National Climate Risk and Vulnerability Assessment Framework (NCRVAF)	Strategic outcome 3.1	40
	Action 3.1.2	Use the NCRVAF to guide sector assessments	Strategic outcome 3.1	40
	Action 3.1.3	Use the NCRVAF to guide provincial assessments	Strategic outcome 3.1	40
	Action 3.1.4	Use the NCRVAF to guide local assessments	Strategic outcome 3.1	40
	Action 4.1.1	Draft, approve, and implement updated National Climate Change Sector Plans to include climate change adaptation	Strategic outcome 4.1	42
	Action 4.1.2	Draft, approve, and implement updated provincial climate change adaptation strategies and associated implementation plans	Strategic outcome 4.1	42
	Action 4.1.3	Draft, approve, and implement updated municipal climate change adaptation strategies and associated implementation plans	Strategic outcome 4.1	42
	Action 4.2.1	Integrate climate change adaptation into Provincial Growth and Development Strategies	Strategic outcome 4.2	43
	Action 4.2.2	Integrate climate change adaptation into provincial sector plans	Strategic outcome 4.2	43
	Action 4.2.3	Amend Development Planning guidelines to incorporate climate change adaptation considerations	Strategic outcome 4.2	43
	Action 4.2.4	Integrate climate change adaptation into municipal development planning documents, budget documents and by-laws	Strategic outcome 4.2	43
	Action 4.2.5	Integrate climate change adaptation into municipal sector plans	Strategic outcome 4.2	43
	Action 4.2.6	Mandate that all public infrastructure (including transport and energy infrastructure) be planned, designed, operated and managed after explicitly taking current and predicted future climate change impacts into account	Strategic outcome 4.2	43
	Action 4.2.7	Mainstream climate change adaptation in business strategic implementation plans	Strategic outcome 4.2	43
	Action 5.1.1	Develop a research roadmap for climate change adaptation	Strategic outcome 5.1	45
	Action 5.1.2	Continue to invest in research that aims to understand the different impacts of climate change on the environment, economy and society	Strategic outcome 5.1	45
	Action 5.1.3	Invest in research on the most effective adaptation responses to different climate change impacts	Strategic outcome 5.1	45
	Action 5.1.4	Establish a programme to promote research into new climate change adaptation technologies	Strategic outcome 5.1	45
	Action 5.1.5	Establish a knowledge dissemination programme to encourage research uptake	Strategic outcome 5.1	45
	Action 6.1.1	Develop and implement an effective communication and outreach programme	Strategic outcome 6.1	47
	Action 6.1.2	Develop and implement a training programme for government officials and politicians	Strategic outcome 6.1	47
	Action 6.1.3	Establish formally accredited training courses	Strategic outcome 6.1	48
	Action 6.1.4	Develop a Climate Change Adaptation and Environmental Education and Training Programme	Strategic outcome 6.1	48
	Action 6.1.5	Incorporate climate change adaptation into relevant, primary, secondary and tertiary curricula	Strategic outcome 6.1	48

	Action 6.1.6	Incorporate climate change into informal education and learning	Strategic outcome 6.1	48
	Action 6.1.7	Enhance social learning amongst all levels of society	Strategic outcome 6.1	48
	Action 6.1.8	Develop climate change education materials that can be used for different sectors and contexts	Strategic outcome 6.1	48
	Action 7.1.1	Create formal climate change legislation for adaptation	Strategic outcome 7.1	51
	Action 7.2.1	Facilitate the meeting of the InterMinisterial Committee on Climate Change	Strategic outcome 7.2	51
	Action 7.2.2	Continue to facilitate the meeting of the Intergovernmental Committee on Climate Change (IGCCC)	Strategic outcome 7.2	51
	Action 7.2.3	Establish a functioning Provincial Committee on Climate Change for each province (this can be an existing forum)	Strategic outcome 7.2	52
	Action 7.2.4	Establish a functioning Municipal Committee on Climate Change for each municipality	Strategic outcome 7.2	52
	Action 7.3.1	Continue to facilitate the meeting of the National Committee on Climate Change (NCCC), a multistakeholder climate change forum	Strategic outcome 7.3	52
	Action 7.3.2	Implement collaborative pilot resilience-building projects	Strategic outcome 7.3	52
	Action 7.3.3	Continue to support knowledge-sharing platforms	Strategic outcome 7.3	52
	Action 8.1.1	Carry out a cost-benefit analysis of the NCCAS	Strategic outcome 8.1	54
	Action 8.1.2	Develop a gender-responsive resource mobilisation strategy	Strategic outcome 8.1	54
	Action 8.1.3	Develop a gender-responsive national climate investment plan	Strategic outcome 8.1	54
	Action 8.1.4	Expand the list of government entities accredited for climate financing	Strategic outcome 8.1	54
	Action 8.1.5	Build the capacity of local accredited implementing entities to access adaptation finance	Strategic outcome 8.1	54
	Action 8.1.6	Develop a project preparation assistance fund	Strategic outcome 8.1	54
	Action 8.1.7	Mainstream NCCAS priorities into the Medium Term Strategic Framework and assign implementation responsibilities	Strategic outcome 8.1	55
	Action 8.1.8	Investigate options to include climate change adaptation parameters in the equitable share allocations of state revenue calculations	Strategic outcome 8.1	55
	Action 8.1.9	Promote knowledge exchange on the economic benefits of public and private sector adaptation action	Strategic outcome 8.1	55
	Action 8.1.10	Invest in new genderresponsive technology and innovation	Strategic outcome 8.1	55
	Action 8.1.11	Build a business case for adaptation in terms of national budgeting for adaptation and develop co-finance mechanisms to leverage donor funds	Strategic outcome 8.1	55
	Action 8.1.12	Create a financial oversight mechanism for donor funding	Strategic outcome 8.1	55
	Action 9.1.1	Establish a M&E system to track progress in achieving the strategic outcomes of the NCCAS	Strategic outcome 9.1	60
	Action 9.1.2	Report on success in achieving the strategic outcomes of the NCCAS	Strategic outcome 9.1	60
	Action 9.1.3	Update the NCCAS based on the M&E learnings	Strategic outcome 9.1	60
	Action 9.1.4	Ensure that M&E information is accessible to stakeholders	Strategic outcome 9.1	60
